Blinkit Dashboard Insights

- * Blinkit generated ₹4.97M revenue from 5000 total orders with an average order value of ₹994.48.
- * Revenue showed strong growth from Month 1 to Month 10, with the highest sales recorded in Month 8, while Months 11–12 showed a noticeable decline indicating seasonal slowdown.
- * Dairy & Breakfast emerged as the top-performing category, followed by Pharmacy and Fruits & Vegetables.
- * Top revenue-generating products were Vitamins, Pet Treats, and Cough Syrup, showing strong customer demand in healthcare and pet care segments.
- * Customer spending analysis revealed a few high-value customers contributing significantly to overall sales revenue.
- * Delivery performance remained efficient with 3470 on-time deliveries, while average delivery delay was approximately 4.4 minutes.
- * Payment methods were evenly distributed, with Card payments slightly leading, followed closely by UPI, Wallet, and Cash transactions.
- * Peak customer ordering activity occurred at 8 AM, with additional spikes during 1 PM and evening hours (6–8 PM), indicating strong breakfast, lunch, and dinner demand patterns.
- * Revenue dipped during mid-day hours (11 AM–4 PM), highlighting lower customer activity during that period.
- * The analysis indicates strong operational performance, growing customer demand, and clear opportunities for inventory optimization, targeted promotions, and delivery efficiency improvements.
